

A Whole Family of Foam

Foam2Foam® professional foam adhesive

ICF professionals throughout North America prefer Foam2Foam® professional foam adhesive over other choices for filling voids, providing sound and thermal insulation, and adhering materials.

Features:

- Controllable bead size
- High yield—up to 1475 linear ft.
- Controlled expansion
- Quick cure and trim

Dow Great Stuff™ Pro foams ... for gaps, cracks and fireblock sealant

Great for filling and air-sealing small holes, gaps and cracks, Great Stuff™ Pro Gaps and Cracks insulating foam sealant also acts as a fireblocking material.

Features:

- Fireblock sealant for residential Type V applications
- Fills, seals and insulates gaps up to 3"
- Bonds to most building materials
- High yield—up to 1,000 linear ft. x 3/8" bead
- Controlled expansion
- Quick cure and trim
- Identifiable orange color

Dow Great Stuff™ Pro foams ... for window and door sealing

Professionals go with the sealing performance of Great Stuff™ Pro Window and Door insulating foam sealant for filling and air-sealing the gap between a window or door and its rough opening.

Features:

- Low pressure formula
- Flexible seal permits expansion and contraction
- Bonds to all window types
- Controllable bead size
- Quick cure and trim

Froth-Pak® Quick-Cure Spray Foam

Filling cavities, walls, floors, cracks, and joints

Froth-Pak® is a foam machine in a carton, with chemical curing that allows the two-part polyurethane foam to be dispensed, expand, and become tack free in seconds.

Features:

- Simple application, no complicated procedures, professional results
- Dispenses, expands and becomes tack free in seconds
- Cures in 1 minute

Simpson Products for ICF Building

You profit from proper anchor placement—especially with Simpson products that building inspectors respect and that roof installers can work with, saving time for the ICF installer.

Titen HD® system for anchoring mudsills instead of anchor bolts

Stronger and more efficient than anchor bolts, Titen HD bolts can replace cast-in-place anchor bolts and save as much as 30%. Forget the hassle of aligning bolts immediately after the pour. Now you can pour, then later drill, drive—and you're done!

ICF ledger connector for easy mounting of wood or steel ledgers

Now it's easy to mount wood or steel ledgers to insulated concrete form (ICF) walls, thanks to connectors that provide both vertical and lateral, in-plane resistance. All you need to do is mark the connector position, cut, and insert the ICFVL connector. Then you simply attach the wood or steel ledger as desired.

Other Simpson product solutions

- Top plate connectors
- Truss connections
- Hurricane ties
- Joist connectors

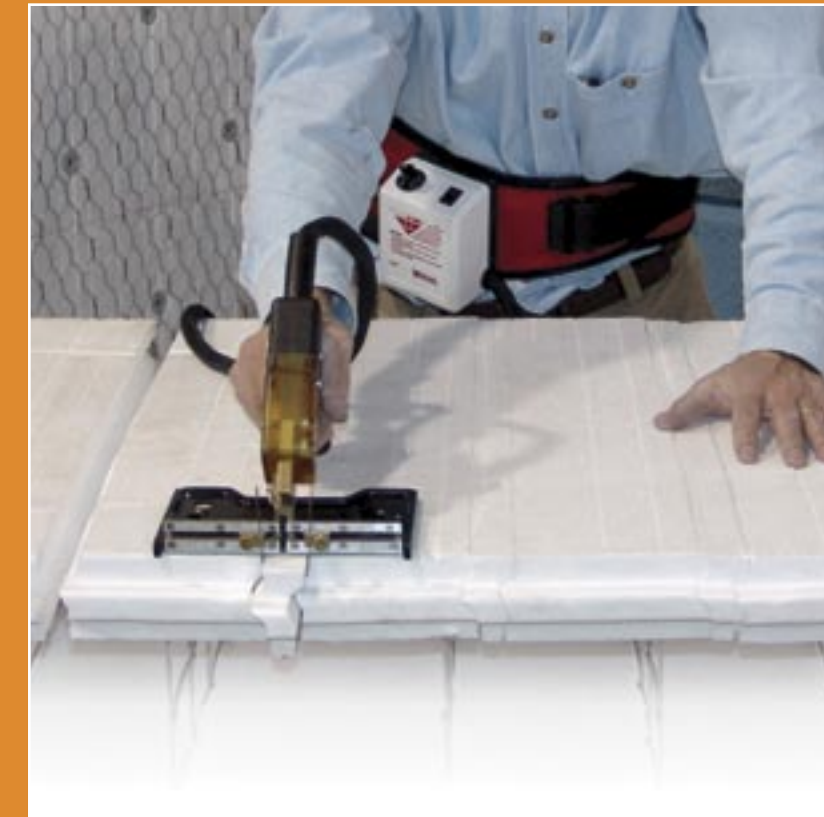

ICF Foam Cutting

Fast, efficient, clean ICF cuts

Wind-lock offers two products to cut ICFs, the QC Hot Knife and the ICF Super Groover. They are the best foam cutting tools available. Blades heat to proper temperature to make quick, precise, clean cuts without beads or dust, but the handle stays cool.

Features:

- Consistent cuts in one fast, clean pass
- Comfortable, cool, easy-grip handle
- Wide variety of blades and attachments
- Operate on standard 110 voltage

Success Starts With a Simple Call

Wind-lock leads the way with all the tools needed to succeed in cutting, gluing and finishing ICF operations. We're part of the success in making ICF construction the quiet, energy efficient, and easy construction choice for thousands of jobs all across the country.

If you are a contractor and want Wind-lock products, just call your local distributor. To find a distributor near you, simply call 1-800-872-5625. For distributors interested in carrying Wind-lock products, also call 1-800-872-5625.

Now shipping from Oakland, California and Jacksonville, Florida to better serve you.
