Wind-lock® GFRC Stealth Access Panel

The same great access panel is now available in GFRC (glass fiber reinforced cement) for exterior installations!

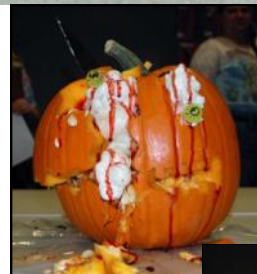

Applications include exterior soffits, porte-cochere, covered drive-up and any other exterior location where you need discrete access and a weather resistant panel.

On a Personal Note...

Summer is winding down, school has started, the pools are closing and Football is in full swing! Now it is time to think about all those interior projects you have been putting off!

As always, we at Wind-lock have a blast at Halloween and I posted some pictures from our pumpkin carving contest last year! We are looking forward to this years festivities!

Gore Galore!

Go Phillies!

Edible Delight!

Featured Project

THE COSMOPOLITAN™
of LAS VEGAS

Stealth Access Panels have been used throughout this hotel, which is slated to open in December.
