Wind-lock Introduces New Exterior Stealth Panel

Leesport, PA – Recognizing a need in the market for a an attractive, exterior access panel, Wind-lock is now offering a glass fiber reinforced cement (GFRC) access panel as an extension of its Stealth product line. Applications include exterior corridors and soffits, porte-cocheres, covered drive-up areas and any other location where discrete access and weather resistance is needed.

“This is a natural extension of our line for interior access panels,” explained Tara Loftus, National Product Manager for Wind-lock. “We identified a need for an exterior panel that could be easily finished to match most exterior claddings.”

The GFRC Stealth Access Panels are available as drop-in or hinged door styles. The weather-resistant cement prevents cracks and rust, and the panels can be finished in stucco, plaster or acrylic finishes.

-MORE-

For more information on GFRC or other Stealth access panels, contact Wind-lock at 800-872-5625.

Serving the construction industry for more than 25 years, Wind-lock has expanded its offering beyond tools and accessories for the EIFS industry. The company has grown to serve other segments of the residential and commercial construction industries including exterior wall systems, insulation, air sealing, moisture management and weatherization. Delivering “What You Need, When You Need It”, Wind-lock ships its products nationally and internationally from five warehouses located across the country.
